

Israel Almeida Rocha

Software Developer

Contact

Personal Profile

- Software Developer with 3+ years of experience specializing in high-performance web applications using React, Next.js, and TypeScript.
- Proven expertise in architecting scalable front-end systems with a strong focus on Clean Code, SOLID principles, and component-driven design.
- Hands-on experience leading development cycles, defining MVPs, and managing technical requirements for SaaS products.
- Skilled in Full-stack development, leveraging Node.js (Express), Prisma, and C# to build robust backend integrations and efficient data models.
- Extensive experience with collaborative workflows using Git and Bitbucket, including strict PR management, code reviews, and mentoring junior developers.
- Deeply committed to engineering excellence, ensuring software quality through automated testing (Cypress) and web accessibility (WCAG).

Professional Experience

- **2025 – Current – Minos LAB (Startup Society)**

Position: Software Developer & Tech Lead

Co-founded a software lab focused on building scalable SaaS products, leading the technical strategy, and mentoring junior developers through high-quality delivery cycles. Main activities:

- Architected and developed full-stack SaaS applications using Next.js, TypeScript, and Express.js, ensuring a robust and scalable codebase.
- Lead front-end development standards using React, Tailwind CSS, and Shadcn/ui, focusing on high-quality UX and modular components.
- Engineered back-end solutions with Prisma ORM and Node.js, managing database migrations and efficient data modeling.
- Established the development workflow, including PR (Pull Request) management in Bitbucket, enforcing Clean Code and strict code review standards.
- Defined project roadmaps and MVPs, translating business requirements into technical tasks and managing the development lifecycle.

- **2025 – 2025 – Defensoria Pública do Estado de Goiás**

Position: Software Developer

Development of government-level web applications focused on legal assistance services, ensuring high availability and accessibility for the public sector.

Main activities:

- Development of responsive interfaces using React, Next.js, and TypeScript.
- Creation and maintenance of a reusable component library following componentization principles.
- Implementation of automated E2E testing suites using Cypress to ensure functionality validation.
- Application of WCAG accessibility practices to enhance user experience for diverse citizens.
- Version control and team collaboration using Git.

- **2024 – 2024 – Escolar Manager**

Position: Junior Developer

Worked on the maintenance and evolution of an ERP education platform, focusing on system stability and automated quality assurance.

Main activities:

- Refactoring and optimization of C# back-end services, improving maintainability.
- Diagnosis and resolution of complex JavaScript front-end issues on the ERP platform.
- Development of automated E2E test scripts using Playwright, accelerating release cycles.
- Technical specification design using BDD/Gherkin to align code with business requirements.

- **2023 – 2024 – Senior Sistemas**

Position: Junior Developer

Focused on the UAU ERP financial modules, handling critical data and backend integrations for large-scale enterprise systems.

Main activities:

- Maintenance and development of critical financial modules using C# .NET.
- Engineering backend solutions and optimizations for production-level business requirements.
- Implementation of REST API integrations for complex JSON data structures.
- Creation of performance and stress testing automation using Puppeteer to improve scalability.

- **2022 – 2023 – Vega Incorporadora**

Position: Developer Intern

Highly focused on front-end development and data management, contributing to the creation of scalable interfaces and efficient database structures.

Main activities:

- Development of modern interfaces using React, focusing on Clean Code and componentization principles.
- Management of source code and versioning using Git.
- Maintenance of back-end services and small task execution using C#.
- Daily data analysis and construction of complex queries and tables using MySQL Workbench.
- Management and structuring of non-relational data using MongoDB.

Education

- UniFANAP - University Center

Qualifications and Complementary Activities

- Languages: English (B2 - Upper Intermediate) and Portuguese (Native).
- Core Stack: React, Next.js (App Router), and TypeScript – 3 Years.
- Back-end & Data: Node.js (Express), C# (.NET), Prisma ORM, PostgreSQL, and MongoDB – 2 Years.
- Styling & UI/UX: Tailwind CSS, shadcn/ui, and Figma (Prototyping) – 2 Years.
- Testing & QA: Cypress, and Puppeteer (E2E & Performance Testing) – 2 Years.
- DevOps & Tools: Git/GitHub/Bitbucket (PR Management), Docker, and Vercel – 3 Years.
- Engineering Excellence: Deep knowledge in Clean Code, SOLID principles, Componentization, and Web Accessibility (WCAG).
